PRIVATE CLOUD SOLUTIONS

SAVE ON CAPITAL EXPENDITURE AND REDUCE RUNNING COSTS

Fully managed cloud solutions hosted on our own hardware and platform. Storage, licensing, backups, redundancy, and support all on a single monthly invoice. No fluctuations, just static pricing.

Save on kWH energy increases to keep your on-premises infrastructure running.

How we're different:

It is our own platform, governed by our SLAs and administered by our engineers. With a 99.9% uptime SLA and immediate response resolution when issues arise. No longer requiring intervention and queuing through third-party vendors. You as our business customer are our number one priority.

All inclusive of all ancillary items, we believe a singular invoice with unlimited usage and no changes best serve our customers and transparency of the services we provide.

Free migration to our platform. Professional services fees and mammoth tasks can be a headache when moving away from on-premises infrastructure. By committing to our platform, we'll take this headache away at no cost to you to ease the burden.
